Objectives

- Promote training and capacity building
- Advance sustained global ocean observations and their applications

What does the fellowship offer?

- 1-3 month visit to another oceanographic institute anywhere in the world
- Training on any aspect of oceanographic observations, analyses, and interpretation

It is NOT meant:

- For an academic course of study
- For pure research

Priority Areas

- Fixed-point time-series observations (e.g. contributing to OceanSITES, ChloroGIN, Antares)
- Large-scale, operational biological observations including biodiversity (e.g. Continuous Plankton Recorder)
- Emerging technologies for ocean observations
- Coastal observations/ Coastal zone management
- Oxygen and Other Biogeochemical Sensors on Floats and Gliders
- Time series measurements of N₂O and CH₄
- Ocean observations and modelling in the Indian Ocean
- Ocean and coastal modelling
- Data management
- Argo floats

What is covered?

- International airfare
- Transport from airport to host institution
- Contribution towards living expenses

What is NOT covered?

- Domestic travel in host country
- Visa costs and insurance
- Salary/bursary
- Training costs

What is needed to apply?

- Application form
- Letter of recommendation
- Letter of acceptance from prospective host
- Quote for flights

Who can apply?

- Scientists
- Technicians
- Graduate students
- Post-doctoral fellows

...from developing countries and countries with economies in transition.
Priority is given to early-career scientists

Deadline: 15 April 2016
